

CLUTCH PLATES

GP.CP Series

Clutch Plates - Steel, Sintered Bronze and Paper Friction Plates are an integral part of multi disc clutches and brakes and are used in various other industrial applications.

Clutch plates / discs are manufactured upto 800 mm diameter and also as per samples/drawings or OEM part numbers in small or large quantities for varied other applications.

Technical Features:

- Superior surface finish with specified Ra values for better performance.
- Raw materials as per required specifications used.

Applications:

The plates are interchangeable in all Electromagnetic, Hydraulic Clutches and Brakes, manufactured by all Leading International Manufacturers.

The Plates are also manufactured for Transmissions and Brakes of Heavy Earthmoving Equipments, Material Handling Machines, Agricultural Equipment, Off Highway Vehicles, Marine Gear Boxes Material handling, Tractors etc. etc.

We manufacture also as per Samples or Drawings in small and large quantities.
